

My name is Heather Caswell, and I am a second year in computer engineering. I am running for SESS VP Administration for the 2018/2019 academic year. My goals include improving the general upkeep of the lounge and office and improving communications between the commissioners whom I oversee. I have outlined my qualifications and my goals in more detail below.

I have lots of experience being in leadership positions in the past, and I am ready to bring my abilities to the SESS executive. I am currently the volunteer commissioner and the yearbook commissioner for the SESS. I was also on the First Year Council last year. I also have lots of experience being in an administrative position from being a camp director in the summertime.

My Goals:

Improve the upkeep of the lounge and office:

I plan to clean and organize the office and lounge for a fresh start in the fall and fix the uneven pool table. I also plan to implement a new system to keep the pool table and equipment in good shape after it is repaired.

Communication with my commissioners:

I plan to keep my commissioners fully informed of any job they may have as soon as I can. I also plan to stay in touch with them at least once a week to communicate any goals for the week and allow them to give me feedback on any issues they may be having with their job.
