SEPTEMBER 25TH

President's Message

Hello from Vancouver. I'm presently away at the CFES President's Meeting representing our college and taking care of business. If you're curious about the CFES (Canadian Federation of Engineering Students), how it works, or the subject matter of this meeting, talk to our VP External Noah Hladun. On to this week:

College Splash

College splash, our annual water balloon fight with the Ag students, will take place **Monday the 25th at 11am**. Meet in the SESS lounge and get ready for a fight.

Ag- Eng Olympics

Following College splash is our Ag-Eng Olympics on Monday night. Stop by our office for more details on this event and to sign your team up.

VP Administration By-election

Applications for the Vice President Administration By-election close on **Monday the 25th**. If you are curious about this position, stop by the office and ask to talk to the ERC chair. The forum date will be announced after applications close and **voting begins of Friday the 29th**.

Finally, everyone's favourite part of the Presidents Message, the terrible joke:

Q: What drink revitalized the French revolution?

A: Liberteau.

Robert Ashton

Update from Quarter Scale Tractor

The University of Saskatchewan Sled Dogs 1/4 Scale Tractor team is a student run design team based out of the College of Engineering open to students from all disciplines and all colleges across campus.

The Sled Dogs had their first meeting where new members were welcome on Tuesday September 19th. There was a barbeque where all new and existing members enjoyed a meal and the new members got a chance to learn more about the team. The new members also had the opportunity to drive one of the tractors still showcased by the team. The first shop day was Saturday September 23rd where members got into the shop, did some work and got some experience working with different kinds of equipment.

On September 29th, from 1:30 to 3:30, the Sled Dogs will be attending the Information Fair Open House where they intend to unveil a project they have been working on to help gain interest in the team.

If you have any questions, stop by room 1A25 in the Hardy Lab or email quarterscale.usask@gmail.com.

Who are we?

The U of S Aero Design Team!

What do we do?

Each year we design and build an RC plane for the SAE Aero Design Competition. This year's design challenge requires us to lift as many tennis ball "passengers" as possible within a 1000W power limit.

When do we meet?

This year we are hoping to move away from logistical meetings and instead organize more design and build sessions. We meet every Wednesday in ENG 1A54 in the Hardy Lab at 6pm.

Where do we compete?

This year's competition will be in either Lakeland, Florida or Van Nuys, California. We'd like to bring as many people as possible!

Why should you join?

If you have an interest in flight, gaining valuable design & build experience, or simply have some free time on your hands (hah), then Aero Design is the club for you! No experience necessary. All years, all disciplines, and all colleges are welcome to join.

How do you join?

Show up to our Wednesday meeting, email uof-saerodesign@gmail.com, or join our group chat for more information.

We hope to see you there!
